Customer Problem Statement 1

Customer Problem Statement 2

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1 – Struggles to use technologies in agricultural field	I am not aware of modern components and though it's terrific in using those.	I'm trying to learn all these, but it consumes lot of time, money and others resources	But I wish to aware of these to improve yield	Because, good crops and vegetables leads to good profit	This makes not only me but also the economic more profitable
PS-2 – Requires more assistance in producing high yield with less requirements	Traditional process are time taking and provides less profit	I'm trying to find a method to rectify this and produce more production	But as there is no proper assistance, all these thoughts, wishes flies away	Because farmers are not well aware of today's advanced technologies but trying to find out.	This makes to feel that farmers are ready to accept growing technologies and only matters is that there is no proper guide to assist them
